TSB LIFT OFF

SERVICE BODIES

1800 Plumber - Lift Off

TSB's lift off ute service body, gives you two vehicles in one!

Work horse during the week – safely, securely and efficiently transporting your tools to the work site! Multi purpose on the weekend - lift off your ute service body to carry surf boards, motorbikes or do tip runs on your flat tray.

- The body is removed and securely stored on 4 independent 1,000 kgs support jacks.
- High strength, light weight aluminium construction, provides maximum weight to strength ratio and corrosion resistance.
- Extensive model range available to suit single, space and dual cab vehicles.

- Chromate dipped and powder coated in a wide range of colours, adding further protection.
- Ergonomically designed to allow easy access to tools and equipment.
- Once the useful working life of the vehicle has been reached, the TSB can be easily transferred to the new vehicle at no additional cost.
- When the vehicle is being serviced or repaired the TSB service body, with tools inside, can be either left on site or transferred to another vehicle, therefore minimising down time and lost days.

FIXED SERVICE BODIES

2400 Diesel - Fixed

TSB also manufacture a large range of fixed service body units for light commercial vehicles. Manufactured from aluminium, which provide the same lightweight benefits as our lift off models, these units are mounted directly to the vehicle chassis and become a permanent fixture. Our fixed ute service bodies can be custom built for commercial operators to suit their specific requirements.

- High strength, light weight aluminium construction, provides maximum strength to weight ratio and corrosion resistance.
- Extensive model range available to suit single, space and dual cab vehicles.
- All components are water and dust resistant, therefore protecting your valuable equipment.

- Chromate dipped and powder coated in a wide range of colours, adding further protection.
- Ergonomically designed to allow easy access to tools and equipment.
- Designed with a unique adjustable mounting rail, allowing the service body to be removed and fitted to another vehicle in the future without any risk of not fitting. This system can even accommodate a different wheelbase.
- Being far more corrosion resistant than steel and at the same time providing the maximum strength to weight ratio, a TSB service body can be easily expected to have a service life equivalent to 2-3 vehicle changeovers.

LIGHT TRUCK

SERVICE BODIES

We also manufacture fixed truck service body units for trucks manufactured from aluminium, which provide the same lightweight benefits as our lift off models.

Optional extras available include:

- Central Locking
- Reversing Camera
- Internal Lights
- Ladder Racks
- Slide out Drawer (100kg rated)
- External Flood & Amber Lights
- Work Tray with 500kg Hoist
- Shovel Drawer
- Tonneau Cover
- Underside Compartments

Our fixed truck service body units are custom built for commercial operators to suit their specific requirements.

ABOUT TSB

TSB is a trading division of **Actco Pickering Metal Industries (APMI)** located in Dandenong, Victoria. For more information on APMI please visit our website www.apm-industries.com.au

APMI has been providing specialist quality sheet metal fabrication and component manufacture since 1974, working in the fields of Automotive, Defence, Rolling stock, Mining and Electrical.

We have over 80 employees dedicated to quality product manufacture.

We are accredited to AS/NZS 9001:2008 which further strengthens our ability to supply quality products.

We are proudly 100% Australian owned and managed.

APMI is also a founding member of the ARM Group.

Our TSB service bodies incorporate the flexibility of vehicle changeover and the benefits of our lightweight aluminium construction and security.

They are currently used by tradespeople, government bodies and large corporations all over Australia and New Zealand.
